Table of Contents

Part 1: Caries—Science

The Disease

1 Ecology of the Oral Cavity

Kim R. Ekstrand, Domenick T. Zero

Teeth . . . 4
Tooth Development and Tooth Emergence . . . 4
Macromorphological Terms . . . 4
Occlusal Surfaces . . . 4
Approximal Surfaces . . . 7
The Cervical Enamel Line and the Roots . . . 7
Enamel . . . 7
Chemical Composition and Structure of Apatite Crystals . . . 8
The Dentin–Pulp Organ . . . 9
The Cementum . . . 10

Saliva . . . 10
Saliva Production, Salivary Glands . . . 10
Function of Saliva . . . 10
Pellicle . . . 12
Hyposalivation . . . 13

Changes in Teeth and Saliva with Aging . . . 13
Dental Plaque or Dental Biofilm? . . . 14
Classifying Oral Microorganisms . . . 14
Colonization of the Mouth in the Newborn . . . 15
Plaque: Development and Metabolic End Products . . . 15
Plaque Stagnation Areas . . . 16
Plaque Composition and Structure in Stagnation Areas . . . 17

2 Etiology and Pathogenesis of Caries

Peter Shellis

Microbiology of Caries . . . 23
Chemistry of Dental Minerals . . . 25
Solubility, Dissolution, and Crystal Growth . . . 25
Minerals of Dental Tissues . . . 26
Fluoride and Calcium Phosphate Chemistry . . . 27

The Cariogenic Challenge . . . 28
Chemistry of Caries . . . 33
Enamel Lesion Formation . . . 33
Dentin Lesion Formation . . . 34
Fluoride and Lesion Formation . . . 34
Remineralization and Lesion Arrest . . . 34

Dental Erosion . . . 35

3 Histological and Clinical Appearance of Caries

Wolfgang Buchalla

Enamel Caries . . . 40
Location in the Teeth . . . 40
The White Spot Lesion . . . 42
Activity of White and Brown Spot Lesions . . . 42
Transmitted and Polarized Light Microscopy . . . 43
Transverse Microradiography . . . 46
Scanning Electron Microscopy . . . 47
Transmission Electron Microscopy . . . 48

Dentin Caries . . . 48
Early Signs of Dentin Reaction . . . 50
Continuing Caries Progression into Dentin . . . 51
Spread of Bacteria within Dentin . . . 52
Hardness of Carious Dentin . . . 52
Fluorescence Properties of Carious and Healthy Dental Hard Tissue . . . 54

Caries of the Exposed Root . . . 55
Caries Arrest and Remineralization . . . 57
Correlation of Histology with Radiography and Clinical Appearance of Caries . . . 58
Erosion—a Noncarious Defect . . . 59

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

4 Paradigm Shift in Cariology

Sebastian Paris, Hendrik Meyer-Lueckel

Scientific Paradigms 65
How Paradigms Influence Our Clinical Approach . 65
The Specific Plaque Hypothesis 65
The Ecological Plaque Hypothesis 66

A Current Model of Caries 66

Diagnostics and Epidemiology

5 Visual–Tactile Detection and Assessment

Kim R. Ekstrand, Stefania Martignon

General Remarks 70
Histological and Clinical Features of Caries 71
Coronal Caries Lesions 71
Root Caries Lesions 73
Caries Adjacent to Restorations 74

Indices for Clinical Recording of Caries Lesions . . 74
Historical Perspective 74

Correlation between Histology and Clinical Severity: the ICDAS System 76
Coronal Caries Lesions 76
Root Caries Lesions 78
Caries Adjacent to Restorations 78

Caries Activity Assessment 79
Coronal Caries Lesions 79
Root Caries Lesions 79
Caries Adjacent to Restorations 80

The Visual Difference between Caries and other Dental Hard Tissue Defects 82

6 Radiographic and Other Additional Diagnostic Methods

Rainer Haak, Michael J. Wicht

Radiographic Caries Diagnostics 87
Context of Radiographic Caries Detection 87
Validity and Reliability of Radiographic Caries Detection 88
Which Gold Standard? 88
Sensitivity and Specificity 89
Reproducibility 89
Conventional and Digital Bitewing X-ray Imaging . . 89
Systems 89
Advantages of Digital Technologies 89
Tuned-Aperture Computed Radiography and Digital Volume Tomography 89
Bitewings 91
Preparations 91
Taking Bitewing X-ray Photos 91
Reproducible Adjustment 92
Documenting the Findings of Bitewing Images . . . 93
Radiographic Extension and Clinical Findings of Approximal Superficial Lesions 93
Evaluating Occlusal Surfaces 94
The Mach Band Effect 95
Estimating the Probability of Caries Progression 95
Determining the Radiologic Follow-up Interval . . . 95
Relevant Factors 95
Special Considerations for Children and Adolescents 96

Other Caries Diagnostic Methods 97
Fiber-optic Transillumination 97
Methods Based on Fluorescence 97
Electrical Conductivity 98

7 Caries Risk Assessment and Prediction

Cornelis van Loveren

The Dentist's Clinical Judgment 103
Crude Hit Rate of a Predictor 103
Utilities of Predictors 105
Objective Predictors 108
ROC curve 110
Cariogram 110
Signs of Past Caries Experience 113
Too Young to Have Past Caries Experience 114
Active versus Nonactive Lesions 115

The Nexø Model 116

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

8 Epidemiology of Caries and Noncarious Defects

Ulrich Schiffner

General Relevance of Epidemiology . . . 119
Study Types . . . 119
Descriptive Epidemiology of Caries and Noncarious Defects . . . 120
Epidemiological Identification of Caries . . . 120
Indices for Coronal Caries . . . 121
Indices for Root Caries . . . 123
Other Indices for Public Health Needs . . . 124
Indices for Noncarious Defects . . . 124
Developmental Defects of the Dental Hard Tissues . . . 124
Acquired Defects of the Dental Hard Tissues . . . 125
Occurrence and Distribution of Caries . . . 125
Trends in Caries Epidemiology . . . 126
Global Considerations . . . 126
Children and Adolescents . . . 126
Association of Caries and Social Status . . . 128
Adults and Seniors . . . 128
Root Caries . . . 129
Occurrence and Distribution of Noncarious Defects . . . 129
Developmental Defects . . . 129
Acquired Defects of Enamel and Dentin . . . 130

9 From Diagnostics to Therapy

Sebastian Paris, Kim R. Ekstrand, Hendrik Meyer-Lueckel

From Diagnostics… . . . 134
Diagnostics at the Individual Level . . . 134
Diagnostics at the Tooth Level . . . 134
How is Caries Diagnosed? . . . 134
The Truth About Caries . . . 135
Diagnostic Errors and Their Consequences . . . 136
The Diagnostic Process . . . 137
Categories and Thresholds . . . 138
…to Therapy . . . 139
Aim of Treatment . . . 139
Treatment Approaches . . . 140
Noninvasive Measures . . . 140
Influencing the Biofilm . . . 140
Influencing Diet . . . 140
Influencing Mineralization . . . 141
Microinvasive Measures . . . 141
Sealants . . . 141
Infiltration . . . 141
(Minimally) Invasive Measures . . . 142
Restoration . . . 142
Additional Measures . . . 142
Which Measures are Indicated at What Time? . . . 142
Individual Level . . . 142
Tooth Level . . . 142
Therapeutic Options for Occlusal Caries . . . 143
Therapeutic Options for Approximal Caries . . . 143
Therapeutic Options for Caries in Accessible Smooth Surfaces . . . 143
Therapeutic Options for Root Caries . . . 144

Noninvasive Therapy

10 Caries Management by Modifying the Biofilm

Sebastian Paris, Christof Doerfer, Hendrik Meyer-Lueckel

Dental Plaque as a Biofilm . . . 147
Mechanical Biofilm Control . . . 148
Correlation between Oral Hygiene and Caries . . . 148
Self-Applied Mechanical Biofilm Control . . . 148
Tooth Brushing . . . 148
Interdental Hygiene . . . 153
Professional Tooth Cleaning . . . 154
Chemical Biofilm Control . . . 154
Chlorhexidine . . . 155
Xylitol . . . 155
Triclosan/Copolymer . . . 155
Essential Oil (Listerine) . . . 156
Sodium Lauryl Sulfate . . . 156
Metal Ions . . . 156
General Considerations . . . 156
Biological Biofilm Control . . . 156
Vaccination . . . 157
Probiotic Therapy . . . 157

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

11 Caries Management by Modifying Diet

Bennett T. Amaechi

Carbohydrates (Sugars) in the Caries Process . . . 162
Conventional Sugars . . . 162
Sugar Metabolism and Acid Production by Cariogenic Microorganisms . . . 163
Intracellular Pathway . . . 163
Extracellular Pathway . . . 164
Factors Modifying the Role of Sugars in Caries Development . . . 165
Frequency of Sugar Intake . . . 165
Consistency of the Sugary Food . . . 165
Amount of Sugar Intake . . . 166
Thickness and Age of the Plaque . . . 166

Sugar Alcohols . . . 167
Xylitol . . . 167
Sorbitol . . . 167
Maltitol . . . 168

Intense Sweeteners . . . 168

Other Food Components . . . 169
Proteins . . . 169
Fats . . . 169
Food Preservatives . . . 169
Fresh Fruits, Vegetables, and Other Dietary Components . . . 170
Influence of Nutritional Deficiencies in the Caries Process . . . 170

Population Groups with Raised Caries Risk Due to Dietary Pattern . . . 170
Children . . . 170
The Elderly . . . 171

Dietary Guidance for Prevention of Dental Caries . . . 171
Snacking Habit . . . 172

Diet and Erosion . . . 172

12 Caries Management by Influencing Mineralization

Svante Twetman, Kim R. Ekstrand

What is Fluorine/Fluoride? . . . 177
Units of Measure . . . 177

Fluoride in Our Surroundings . . . 177
Fluoride in Humans . . . 177
Acute Toxicity . . . 177
Fluoride Absorption and Distribution . . . 178
Fluoride in Teeth . . . 179
Fluoride in Saliva and in Plaque . . . 179

From Mottled Enamel (Colorado Stained Teeth) to Dental Fluorosis . . . 180
Prevalence of Dental Fluorosis . . . 180

Effects of Water Fluoridation on Caries and Dental Fluorosis: Pre- or Posteruption? . . . 182
How Fluoride Interacts with the Caries Process . . . 183
Formation of Calcium Fluoride . . . 183
Influence of Fluoride on Microbial Metabolism . . . 184
Discussion of Classical Data . . . 184

Clinical Effectiveness of Fluoride . . . 185
Systemic and Topical Fluorides . . . 186

Community-Based Fluoride Application . . . 186
Water Fluoridation (After Introduction of Fluoride Toothpaste) . . . 186
Fluoridated Milk and Salt . . . 186

Individual Fluoride Application: Professionally Applied Fluorides . . . 186
Fluoride Varnishes . . . 186
Fluoride Solutions . . . 187
Fluoride Gels . . . 188

Individual Fluoride Application: Self-Applied Fluorides . . . 188
Fluoride Toothpaste . . . 188
Fluoride Mouth Rinses . . . 189
Fluoride Tablets and Chewing Gums . . . 189
Other Fluoride-Containing Products and Devices . . . 189

Safety of Fluorides . . . 189
Guidelines . . . 190
Other Remineralization Agents . . . 190
CPP-ACP . . . 190

13 Oral Health Promotion: Implementation of Noninvasive Interventions and Health-Related Behaviors to Control the Caries Process

Hendrik Meyer-Lueckel, Sebastian Paris

Implementing Strategies of Prevention . . . 195
Prevention—What Does This Mean? . . . 195
Why Do People Get Sick? . . . 195
A Little More Upstream: Setting-Approaches . . . 196
Most Upstream: the Population-Based Common Risk Factor Approach . . . 197

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

Contemporary Strategies to Improve Oral Health 197
High-Risk versus Population-Based 197
Noninvasive Interventions versus
Behavioral Change in Caries Prevention 199

Is it Possible to Change Oral Health–Related Behaviors? 199
Definition 199
Models 199

Effectiveness of Contemporary Programs for Caries Prevention 200
Role of Routine Serial Examinations in Communities 200
Population-Based Approaches 200
Mass Campaigns to Change Behavior 200
Fluoridated Water 200
Fluoridated Salt 200
Approaches for Communities: Medical Options . . . 201
Fluoride Tablets 201
Providing Free Fluoride Toothpaste 201
Other Methods of Fluoride Application 201
Approaches for Communities:
Oral Health Education 202
Supervised Tooth Brushing 202
Programs Relying on Oral Health Education . . . 202
Setting-Approaches 203
Approaches for Communities:
Combining Medical Options and Oral Health Education 203
One-to-One Situation in Dental Practice 204

Adhesion

14 Basics in Adhesion Technology

Bart Van Meerbeek, Yasuhiro Yoshida

Evolution of Adhesive Technology in Generations 209
Early Days 209
Breakthrough in Adhesion Technology 210
No Separate Etching? 210

Modern Classification of Adhesives 210
Interaction with Hydroxyapatite-Based Tissues . . 212
Current Strategies for Bonding to Enamel 212
Obstacles in Bonding to Dentin 214
Bonding to Dentin through the Etch-and-Rinse Approach 214
Shortcomings of Etch-and-Rinse Technology and Potential Solutions 215
Wet Bonding—How Moist is Wet? 216
Rewetting 216
Nanoleakage 217
Recent Developments 217

Bonding to Dentin through the Self-Etch Approach 218
Nomenclature 218
Mild Self-Etch Adhesives 218

Mechanisms of Bond Degradation 219
Bonding to Carious Dentin 220
Clinical Performance 220
Epilogue 221

Microinvasive Therapy

15 Fissure Sealing

Hafsteinn Eggertsson

Caries Prevalence on Occlusal Surfaces 226
The Sealant–Restoration Spectrum 226
Epidemiological considerations 227

Fissure Morphology 228
The Fissure as Substrate for Resin Bonding 229
Cleaning of Fissures Prior to Sealant Placement . 230
Should Mechanical Preparation Be Routine? 230
Glass-Ionomer Sealants 231
Preventive versus Therapeutic Sealants 231
Sealing over Caries? 232
Moisture Control 233
Are Sealants Working Clinically? 233
Sealant Failures and Maintenance 234
Cost-Effectiveness of Sealants 234
Widespread Use of Sealants 235
Conclusion 236

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

16 Transfer of the Sealing Technique from the Occlusal to the Approximal Surface

Stefania Martignon, Kim R. Ekstrand

Transfer of the Sealing Technique from the Occlusal to the Approximal Surface 240
Clinical Procedure 240
Which Approximal Lesions Should Be Sealed? 240
Techniques for Approximal Sealing 241
Sealing Procedure 241
Patch Technique 241
Clinical Evidence 242

17 Caries Infiltration

Hendrik Meyer-Lueckel, Sebastian Paris

Development of Caries Infiltration 246
Biological Principles 246
Principle of Caries Infiltration 248
Infiltration to Prevent Caries Progression 249
Clinical Efficacy of Infiltrating Approximal Surfaces 250
Indications for Approximal Caries Infiltration 250
Clinical Use of Approximal Caries Infiltration 253
Follow-up for Approximal Caries 253
Infiltration for Primarily Esthetic Reasons 253
Scientific Studies 253
Indication 254
Follow-up 255

Invasive Therapy

18 How Much Caries Do We Have to Remove?

David D. J. Ricketts

Historical Perspective 260
When to Remove Caries? 261
Enamel Lesion 261
Enamel–Dentin Junction 261
Cavitation 261
Microbial Invasion of Dentin 262
Dentin Caries 263
Conventional Caries Removal 264
Caries Removal at the Enamel–Dentin Junction . 264
Contemporary Caries Removal 265
Pulp–Dentin Complex 265
Deep Caries 265
Fissure Sealant Studies 266
Stepwise Excavation Studies 266
Systematic Review of the Literature 268
Is There a Need for Cavity Disinfection? 268

19 Minimally Invasive Therapy with Tooth-Colored Direct Restorative Materials

Roland Frankenberger, Uwe Blunck

Indications for Restorative Therapy 272
Posterior Teeth 272
Anterior Teeth 272
Cervical Area 273
Manifestations and Causes 273
Technical Limits to Direct Restorative Materials . . . 273
Materials for Tooth-colored Direct Restorative Therapy 275
Overview 275
Glass-Ionomer Cements 275
Composites 275
Resin-Modified Glass-Ionomer Cements 276
Compomers 276
Choosing Materials for Different Indications 277
Posterior Region 277
Anterior Region 277
Cervical Defects 277
Preparation Instruments 277
Excavation 277
Rotating Preparation 277
Oscillating Preparation 277
Rules for Minimally Invasive Preparation 278
General Preparation Rules 278
Access Forms 278
Anterior Region 278
Posterior Region 278
Class I (Fissures and Grooves) 278
Class II (Approximal-Occlusal) 279
Class III and Class IV (Anterior Tooth) 279
Class V (Cervical Area) 279
Problems in the Treatment of Cervical Defects . 279
Damage to the Neighboring Tooth in Approximal Preparations 280

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

Clinical Experience with Minimally Invasive Restorative Therapy 280
Posterior Teeth 280
Anterior Teeth 281
Cervical Area 281
Repairing Restorations 282

Treatment Decision

20 Decision-Making in Managing the Caries Process
Hendrik Meyer-Lueckel, Martin J. Tyas, Michael J. Wicht, Sebastian Paris

Fundamentals of Evidence-Based Dentistry 287
Treatment Recommendations 288
Study Types 289
Shared Decision-Making 289
The Doctor–Patient Relationship 290
Including the Patient in the Decision-Making Process 290
Implementing Shared Decision-Making in Practice 291
The Nine Steps of Shared Decision-Making 291
Decisions, Decisions: Noninvasive, Microinvasive, or (Minimally) Invasive? 292
When in Rome, Do as the Romans Do 292
Economic Consequences of the Time of Therapy . . . 293
Consequences on Therapy of "Philosophy" in Cariology 293
Philosophy "Drill and Fill" 293
A New Philosophy: "Heal and Seal" 293
Limits to Noninvasive Therapies 294
Micromorphological Aspects 294
Clinical Considerations 294
Radiographic Extension—Cavitation of the Surface 294
Cavitation—Biofilm 295
Biofilm—Caries Progression 295
Speed of Caries Progression 295
Limits to Microinvasive Therapies 296
Avoidance of Overtreatment 297
The Problem of Undertreatment 297
Dentin Involvement 297
Residual Microorganisms 297
Limits to Invasive Therapies 297
Decision Trees and Choice of Therapy 299

Special Aspects in Children and the Young

21 How to Maintain Sound Teeth: an Individualized Population Strategy for Children and Adolescents
Kim R. Ekstrand

The Multifactorial Concept of Caries 306
Relevant Epidemiology 307
Caries in the Primary Dentition 307
Caries in the Permanent Dentition 307
Caries Progression Rate through the Enamel 308
Eruption Time for Teeth in the Two Dentitions . . . 308
Diagnostics of Caries in the Child Population 308
Individualized Population Strategy 308
Documentation of caries experience 310

22 Individualized Caries Management in Pediatric Dentistry
Christian H. Splieth, Mohammad Alkilzy

Deciduous versus Permanent Teeth 314
Anatomy 314
Epidemiology 314
Function and Longevity 314
Erupting Permanent Teeth 315
Treatment Concepts in Deciduous Teeth 315
Buccal Surfaces 315
Occlusal Surfaces 316
Approximal Surfaces 316
Minimum Intervention in Permanent Teeth in Children and Adolescents 316
Occlusal Surfaces 317
Sealants for Individuals at High Risk of Caries . . 318
Approximal Surfaces 318

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

A Glimpse into the Future

23 Future Trends in Caries Research
Brian H. Clarkson, Agata Czajka-Jakubowska

Genetic Approaches 321
Genomics—Caries Susceptibility 321
Probiotics—Replacement Therapy with non-Acid-Producing Bacteria 321
Gene Therapy—Repairing Salivary Glands 321

Proteomics 322
Antibody Engineering—Bacterial Adherence 322
Enzyme Recognition—Caries Activity Assessment . . 322

Tissue Engineering 322
The Dentin–Pulpal Complex 322

Nanotechnology 323
Dendrimers—Antimicrobials/Antiadherents 323
Antibacterial Nanoemulsions 323
Degradable Microspheres—Remineralizing Agents . 323
"Smart" Materials—Responding to Physiological and Nonphysiological Changes in the Oral Cavity . . 324
Synthetic Enamel 324

Part 2: Caries—Clinical Practice

24 Diagnostics, Treatment Decision, and Documentation
Sebastian Paris, Rainer Haak, Hendrik Meyer-Lueckel

Caries Diagnostics at the Patient Level 330
Determining the Risk Factors 331
Caries Experience 331
Sugar Consumption 331
Frequency of Food Consumption 331
Oral Hygiene 331
Fluoride Sources 331
Salivary Flow 331
Calculating the Caries Risk and Consequences 331

Caries Diagnostics at the Tooth Level 333
Visual–Tactile Examination 333
Primary Caries 333
Caries Adjacent to Restorations 333
Additional Diagnostic Tools 335
Bitewing Radiographs and Fiberoptic Transillumination 335
Laser Fluorescence 336
Endodontic Findings 336
Additional Diagnostics 336

Diagnosis and Planning a Therapy 337

25 Minimal Interventional Treatment of Caries in the Permanent Dentition: Clinical Cases
Hendrik Meyer-Lueckel, Sebastian Paris, Christian A. Schneider, Leandro A. Hilgert, Soraya Coelho Leal

Case 1: A 30-year-old Woman with Low-to-Medium Caries Risk 339
Hendrik Meyer-Lueckel, Sebastian Paris
Anamnesis 339
Clinical Findings (Tooth Level) 339
Caries Risk Assessment (Individual Level) 341
Diagnoses and Treatment Plan 342
Individual Level 342
Tooth Level 342
Clinical Aspect at the End of the Treatment 348
Follow-up 348

Case 2: A 22-year-old Man with Medium Caries Risk 351
Hendrik Meyer-Lueckel, Sebastian Paris
Anamnesis 351
Clinical Findings (Tooth Level) 351
Caries Risk Assessment (Individual Level) 352
Diagnosis and Treatment Plan 353
Individual Level 353
Tooth Level 353
Clinical Aspect at the End of the Treatment 360
Follow-up 360

Case 3: Minimally Interventional Anterior Restorations 361
Christian A. Schneider, Hendrik Meyer-Lueckel
Anamnesis 361
Clinical Findings 361
Caries Risk 361
Diagnosis and Treatment Plan 362
Individual Level 362
Tooth Level 362

Case 4: Infiltration to Mask Caries Lesions 367
Leandro A. Hilgert, Soraya Coelho Leal
Anamnesis 367
Clinical Findings 367
Caries Risk 368
Diagnosis and Treatment Plan 368
Individual Level 368
Tooth Level 369
Clinical Aspect at the End of the Treatment 370

Case 5: Stepwise Caries Excavation 371
Hendrik Meyer-Lueckel, Sebastian Paris

aus: Meyer-Lueckel u. a., Caries Management - Science and Clinical Practice (ISBN 9783131547118) © 2013 Georg Thieme Verlag KG

26 Minimal Interventional Treatment of Caries in Young Children: Clinical Cases

Vera Mendes Soviero, Soraya Coelho Leal, Christian Splieth, Mohammad Alkilzy

Case 1: A 6-Year-Old Boy with High Caries Risk . . 374
Mohammad Alkilzy, Christian Splieth
Anamnesis 374
Clinical Findings (Tooth Level) 374
Caries Risk Assessment (Individual Level) 375
Diagnosis and Treatment Plan. 376
Individual Level 376
Tooth Level 377
Clinical Aspect at the End of the Treatment 380
Follow-up 380

Case 2: A 7-Year-Old Girl with Medium Caries Risk 381
Vera Mendes Soviero, Soraya Coelho Leal
Anamnesis 381
Clinical Findings (Tooth Level) 381
Caries Risk Assessment (Individual Level) 381
Diagnosis and Treatment Plan. 383
Individual Level 383
Tooth Level 383
Follow-up 385

Case 3: A 6-Year-Old Girl with Very High Caries Risk 385
Vera Mendes Soviero, Soraya Coelho Leal
Anamnesis 385
Clinical Findings (Tooth Level) 385
Caries Risk Assessment (Individual Level). 386
Diagnosis and Treatment Plan 388
Individual Level 388
Tooth level. 389
Clinical Aspect at the End of the Treatment 393
Follow-up 393

Case 4: An 8-Year-Old Boy with Medium Caries Risk 394
Vera Mendes Soviero, Soraya Coelho Leal
Anamnesis 394
General Findings 394
Oral Health Indices 394
Clinical Findings (Tooth Level) 394
Caries Risk Assessment (Individual Level). 397
Diagnosis and Treatment Plan 397
Individual Level 398
Tooth Level 398
Monitoring and Recall 399

27 Appendix

Dental examination form 401
Caries risk analysis 402
Treatment plan 403

Index 405
